PROFESSIONAL PROFILE

Computer Science student with hands-on experience building data pipelines and applications that integrate APIs, vector search, and relational databases (Java, Spring Boot, PostgreSQL, PGVector). Comfortable working with messy, incomplete data and reconciling it into structured, reliable outputs. Proficient in Python, SQL, and JavaScript/React, with practical exposure to ETL-style workflows, entity/skill matching via embeddings, and REST API integration. Strong analytical and research skills, with a track record of investigating alternative data sources to fill gaps when a single source is incomplete. Seeking a Data Acquisition Engineer or software engineering/AI-ML internship starting May 2027.

CORE COMPETENCIES

Problem Solving | Analytical & Data Research | Data Reconciliation | Teamwork | Communication | Adaptability

TECHNICAL SKILLS

Python | SQL | Java | JavaScript | React | REST API Integration | ETL / Data Pipelines | Entity Resolution & Matching | Git | AWS | Machine Learning | Deep Learning | Generative AI

EDUCATION

Bachelor of Science in Computer Science — GPA: 3.850
University of North Texas, Denton, TX — Expected Graduation Date: May 2028

HONORS & AWARDS

Dean's List – Tarrant County College — Spring 2025, Summer 2025, Fall 2025, Spring 2026
Dean's List – University of South Dakota — Fall 2024

ADDITIONAL CERTIFICATIONS

Google: Introduction to Large Language Models — May 2026
LinkedIn: Introduction to Artificial Intelligence — Sep 2026
LinkedIn: Cybersecurity Foundations — Sep 2026

PROJECTS

AI Resume Detector & Analyzer — Spring 2026 – Present
Personal Project

- Building a Java/Spring Boot application with Spring AI, RAG, PostgreSQL, and PGVector to acquire, structure, and reconcile resume and job-posting data into a searchable knowledge base.
- Implementing embedding-based entity matching and data ingestion logic to reconcile resume skills with job requirements, normalize messy and inconsistent text, and surface skill gaps and personalized recommendations.
